SUMMARY

Full-stack developer with 4+ years of experience developing and maintaining production web applications, with expertise in Next.js, React, TypeScript, Node.js, and SQL databases. Progressed from junior developer to lead developer, taking on increased responsibility for application architecture, production deployments, infrastructure management, code reviews, and technical troubleshooting. Experienced in subscription-based platforms, CMS development, payment integrations, and cloud infrastructure across multiple environments.

SKILLS

Front-End: Next.js, React, TypeScript, JavaScript, HTML5, CSS, Redux Toolkit
Back-End: Node.js, Express, REST APIs, Prisma, Sequelize
Databases: MySQL, PostgresSQL, PlanetScale
Cloud & Infrastructure: AWS (EC2, S3), Vercel, Heroku, Git, Bash, Linux, PM2, Apache
Payments & Integrations: Stripe (subscriptions, webhooks, checkout), PayPal, HubSpot API, Asana API

WORK EXPERIENCE

Integrated Media Services **Manalapan, NJ**
Lead Developer (Contract) Nov 2025 - Present

- Oversee development, maintenance, and production deployments across 8 Next.js applications and supporting backend services.
- Manage production infrastructure across Vercel, AWS EC2, and Heroku, troubleshooting deployment, server, and application issues.
- Review code, approve pull requests, and coordinate production merges and releases across shared codebases.
- Maintain production MySQL databases on PlanetScale, handling schema changes, database troubleshooting, and production fixes.
- Investigated unexpected AWS infrastructure costs, identified the likely source, and coordinated shutdown to prevent continued unnecessary expenses.

Developer (Contract) Aug 2022 – Nov 2025

- Developed and maintained full-stack web applications using Next.js, React, TypeScript, Node.js, and SQL databases.
- Built backend services, API integrations, and database functionality using Express, Prisma, and Sequelize.
- Implemented application features for CMS platforms, subscription workflows, and third-party service integrations.
- Troubleshot production issues, resolved bugs, and collaborated with developers using Git and pull request workflows.

EDUCATION

Rutgers Coding Bootcamp - Certificate in Full Stack Web Development May 2022
Rutgers University, School of Engineering - Bachelor of Science - Mechanical Engineering May 2003
